Art Unit: 1755

The following is an examiner's statement of reasons for allowance:

The prior art of record, either alone or in combination, fails to anticipate or render obvious the instantly claimed crystallized glass and optical filter containing the glass. The closest prior art of record constitutes U.S. 4,310,595 to Beall. As argued by applicants on pages 12-13, Beall is clearly deficient in that the molar ratio of  $K_2O:Na_2O$  is clearly distinct from that claimed herein by applicants. Further, as argued by applicants, Beall doesn't require  $CaO+SrO+BaO$  to be 0.1 to 10 mol%. Additionally Beall does not disclose the specific transmittance claimed in the instant application. Finally, as argued by applicants, Beall would appear to teach away from the instant claims requiring a  $K_2O:Na_2O$  of greater than or equal to 1.5.

Based on the claim amendments restricting the glass to the claimed composition, it is considered that there is no reason to believe from the disclosure of Beall that one can arrive at a glass having the herein claimed transmittance. Accordingly, the preponderance of the evidence on this record supports the patentability of the herein claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Umbach on September 21, 2005.

The application has been amended as follows:

Cancel claims 20, 21 and 24-27.
